

More information about Admission Requirements-Master's Degree in Logistics Management

1. For candidates who studied two majors throughout their BA studies, the average grade will be derived from the final grades in both majors. Candidate who obtained their degree from a branch of a foreign university or by distant learning must obtain a grade of at least 70% in the GMAT or GRE exams.

2. In some cases the required average will depend on the area of the undergraduate studies

3. Admission is subject to the number of vacancies in the department. Places are limited and therefore the highest ranked applications will receive priority.

The Department of Management is not obligated to accept all applicants who meet the conditions stated above

4. Final screening of candidates will be held at the discretion of the department

5. The Master's degree committee of the university is responsible for making the final decision whether or not to accept a candidate

6. Those students who have not yet completed their final year of undergraduate studies at the time of application must submit by the end of December of the same academic year a letter of intent regarding the completion of their studies to the university's Master's Degree Committee

7. Decisions of the university's Master's Degree Committee will be based solely on the grades submitted at the time of registration. The committee will not wait for the final grades of those applicants who have not yet completed their studies. Furthermore, the committee will not consider grades that have been improved after registration.

8. Every new student is initially accepted to the non-thesis track. Those students who wish to transfer to the thesis track are requested to submit an application form to change tracks.

Criteria Influencing Admission

1. Total average undergraduate grade. The minimum grade requirement varies with the program of studies and the applicant's various areas of study.

2. Proven relevant administrative experience of at least 3 years in the desired field of study is an added advantage but will not replace the minimal requirements required for undergraduate degree studies. (In the Executive MA, at least three years experience is mandatory.)

3. An existing average grade from graduate studies (or partial average grade) if available

4. Final acceptance decisions will be made at the end of the registration period according to enrollment figures.
